April 2012

## ALS MARINE Group of companies

Our group of companies is happy to announce that we were exhibitors at Oceanology International 2012 at London Excel between the 13-15<sup>th</sup> of March.

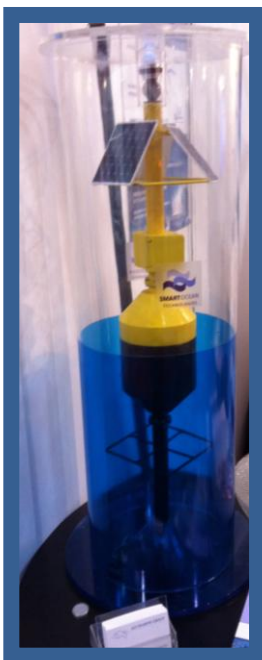

Almost 200 visitors stopped by our exhibiting booth where our representatives informed them of our products and services.  
The show was a success for everyone.

Our group of companies ALS MARINE acquired new representations.

Lasting partnerships were secured with companies that conduct field work with geophysical instruments for sea-bottom classification and underwater vehicles for research for offshore oil and gas platforms. These collaborations involve areas of West Africa and Brazil.

The interest of a German company that manufactures autonomous underwater vehicles was reaffirmed for the manufacturing, design and construction of a robust outer shell for autonomous underwater vehicles to be given to B & T composite and ALS MARINE.

The buoy brought in by SMART OCEAN TECHNOLOGIES attracted major interest and many visitors. We discussed specific opportunities and representation in countries such as South Africa, Saudi Arabia, HAE, Ghana, India, China and Nigeria.

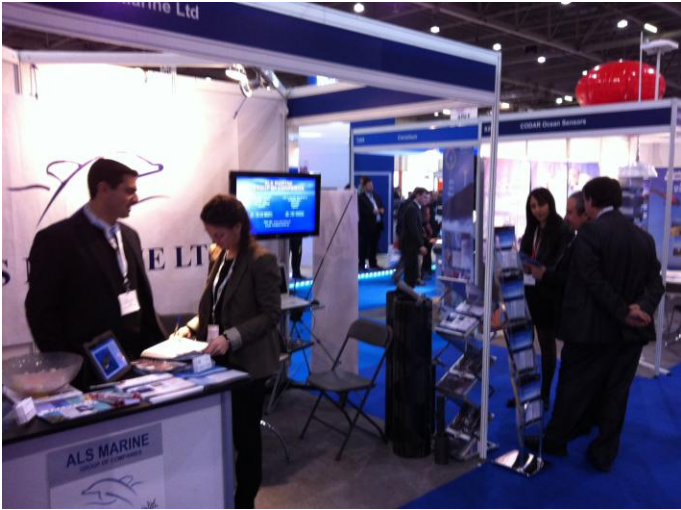

Model of a smart buoy, Scale 1:9 by Smart Ocean Technologies

Cylinders made from carbon fibre using filament winding method. Cylinders designed by Als Marine and produced by B&T Composites.

Oceanology International is the global forum where industry, academia and government share knowledge and connect with the marine technology and ocean science community, improving their strategies for measuring, exploiting, protecting and operating in the world's oceans.

**Oceanology International 2012** has been the largest event to date, with over 7,700 unique visitors from over 70 countries.
